PERFORMANCE-INSPIRED DRIVING MEETS

ERGONOMIC DESIGN

The All-New Honda FIT is here to deliver an advanced driving experience with sleek, sophisticated finishes and generous interior space, now also available with Honda's new e:HEV Hybrid Technology.

This performance-inspired companion takes metropolitan manoeuvrability to new heights with the following specifications:

Advanced hybrid powertrain delivering optimum efficiency and performance.

Evolved, contemporary design of the iconic Honda Jazz silhouette.

Class-leading interior space and outstanding practicality.

Suspension enhancements delivering a dynamic driving experience.

Finding your FIT has never been this easy.

OUTSTANDING *DETAILED DESIGN*

When designing and building the latest FIT, Honda engineers restructured their approach. They conceived a compelling new proposition in the compact segment: An all-new city car that boasts outstanding everyday usability and readiness to meet the needs of modern consumers.

While the overall height is reduced by 13mm, the FIT now showcases a forward-leaning tailgate design to create a more compact looking, well-balanced cabin and a reassuringly surefooted stance. The sweeping A-pillars and a sleek door-mirror design minimises noise and drag caused by wind turbulence and increases aerodynamic efficiency.

ADVANCED, INTUITIVE *INTERACTION*

The car's interior designers paid great attention to detail when creating the uncluttered dashboard and interface. In response to consumer demand, Honda has reinstated physical controls for key functions, with tactile, precise-feeling dials for heating and ventilation settings.

Connectivity is key and the Honda FIT provides a seamless experience that allows owners to link daily digital interactions with the highly intuitive 9" LCD touchscreen interface for minimised driving distraction. Easy access to convenient features, functions and controls are accessed with the help of the HMI (human-machine interface) system.

Driver assistance is displayed and accessible on the 7" TFT Digital Driver Display meter and smartphone controls enable smartphone mirroring via Apple CarPlay and Android Auto.

ULTIMATE CONVENIENCE

Stowing more in your Honda FIT is not only possible but also convenient with a single-motion configuration of our exceptionally versatile Honda Magic Seats®. This way, you can utilise extra load space to take advantage of the car's height from floor to ceiling. This compact city car also features a lower tailgate edge, tailgate aperture, and a flat cargo floor that can handle a variety of luggage or lifestyle-related equipment.

The functionality of the Honda Magic Seats® is boundless. With four simple configurations, you can pack just about anything into your new FIT:

Refresh Mode

Enjoy the view by removing the head restraints and folding back the seats.

Tall mode

Fold up the rear seats to gain some extra storage height.

Long Mode

Fold down all the seats on the left- or right-hand side of the car and you will have plenty of room for those long items.

Utility Mode

Need to take your gear with you for an outdoor excursion? Just fold down the rear seats and you are good to go.

e: HEV HYBRID POWERTRAIN **TECHNOLOGY**

The FIT's powerful compact dual electric motors are connected to a 1.5-litre i-VTEC petrol engine, with peak power output from the propulsion motor. The total output of 80kW and 253Nm of electric propulsion torque can propel the car to 100km/h in just 9.4 seconds and on to a maximum speed of 175km/h. The effect is an effortless and comfortable journey, whether travelling through urban areas or cruising at high speed on motorways.

Rather than using a conventional transmission, the FIT Hybrid is equipped with a newly developed Electronically controlled Continuously Variable Transmission (e-CVT) with a single fixed-gear ratio to create a direct connection between moving components. The result is a smooth and reassuring transfer of torque with a linear feel during acceleration across all drive modes.

Driving Modes

To deliver a highly-rewarding driving experience and exceptional efficiency, the advanced e:HEV hybrid set-up seamlessly selects from three interchangeable drive modes:

EV Drive

The lithium-ion battery supplies power to the electric propulsion motor directly

Hybrid Drive

The engine generates power via the electric generator motor, which in turn supplies it to the electric propulsion motor

Engine Drive

The petrol engine is connected directly to the wheels via a lock-up clutch and drive force is transmitted directly from engine to the wheels

Honda SENSING

Adaptive Cruise Control

Manages the distance to the car in front automatically by continuously adjusting the speed, allowing the car to follow traffic at highway speeds.

Collision Mitigation Steering System

Boasts improved night-time operation which detects pedestrians when there is minimal street lighting. The system applies brakes when the FIT cuts across or turns into the path of an oncoming vehicle thanks to the new wide-view camera.

Lane Keeping Assist System

Prevents the vehicle from drifting into adjacent lanes by detecting lane markers on the road.

Road Departure Mitigation

This system assists the driver not to stray from the road. It alerts the driver if it detects that the vehicle is approaching the outer edge of the road, or an oncoming vehicle, or drifting into another lane without indicating.

SUPREME SAFETY TECHNOLOGY

Exclusive to the all-new FIT Hybrid model, is the Honda SENSING™ Active Safety Suite, which features world-class safety technologies for uncompromised driving security, alongside exceptional driving efficiency introduced in all Honda FIT e:HEV Hybrid models.

Passive safety is as important to Honda as active safety to protect occupants in the event of an accident. FIT owners and occupants are protected by the following:

Anti-lock Braking System (ABS)

Rear Child Safety Locks

Advanced Compatibility Engineering (ACE) Body Structure

Back-up Camera

Vehicle Stability Assist (VSA) with traction Control

Front, Side & Curtain SRS Airbags

MODEL SHOWCASE

The all-new FIT range will launch with four models, the Comfort, Elegance and Executive models available exclusively in 1.5L Petrol CVT, as well as the flagship Hybrid model available with Honda's 1.5L i-MMD e-CVT hybrid system.

Experience a wide range of substantial features available on the Comfort, Elegance, Executive and Hybrid grades within the Honda FIT range that include:

1.5 Comfort CVT

- 15" Steel Wheels
- Push Button Start
- Halogen Headlights
- 5" Display Audio and 7" Driver Display
- Cruise Control
- 4-Speaker Sound System

1.5 Elegance CVT

- 16" Alloy Wheels
- LED Headlights and Fog Lights
- 9" HMI Infotainment System
- Reverse Parking Camera
- Soft-Touch Dashboard
- Premium Fabric Upholstery

1.5 Executive CVT

- 16" Alloy Wheels
- Smart Keyless Entry
- Front Heated Seats
- FR & RR Parking Sensors
- Ext. Chrome Decoration
- Genuine Leather Upholstery

1.5 Hybrid e-CVT

- 1.5 i-MMD Hybrid Powertrain
- Honda SENSING™
- Adaptive Cruise Control
- Collision Mitigation Braking
- Lane Keep Assist
- Auto High-Beam

MODEL ACCESSORIES

Customising your FIT is the cherry on top. Make it truly yours with a range of add-ons to set the tone for a tailor-made driving experience.

- 1 Side Skirts
- 2 Step Illuminator
- 3 Front Spoiler
- 4 Roof Carrier
- 5 Rear Under Spoiler
- 6 Tailgate Spoiler
- 7 Mud Guard

THE FETCHING FIT **COLOUR RANGE.**

The colour line-up for the new FIT range includes a host of new colours including Opal White (Pearl), Crystal Red (Metallic), Meteoroid Grey (Metallic), Midnight Blue (Metallic), and Rose Gold (Metallic), in addition to existing line-up colours which include Platinum White (Pearl) and Lunar silver (Metallic).

Rose Gold (Metallic)

Platinum White (Pearl)

Opal White (Pearl)

Midnight Blue (Metallic)

Meteoroid Grey (Metallic)

Crystal Red (Metallic)

Lunar silver (Metallic)

Entire Range (PET & HEV)			Hybrid (eHEV)	
Warranty	5 year / 100 000 km		Warranty - 8-year / 200,000km (covering the hybrid components such as battery, PCU, electrical system etc.)	

Indicated CO₂ and fuel consumption figures quoted are obtained when testing the vehicle in line with the compulsory requirements of SANS 20083 and therefore may not necessarily be achieved under day-to-day driving conditions. Actual fuel consumption figures may be influenced by a range of factors, including but not limited to vehicle maintenance, driving style and behavior. Fuel consumption may be further affected by the environmental factors and conditions under which the vehicle is operated including altitude, road condition and traffic flow. The figures used in this guide should therefore be treated as indicative only.
